Dear Sir:

I am sending this letter requesting you cancel the Cooperative's solid waste registration. Our solid waste registration generator number is **33765**. The cooperative wishes to be reclassified as a municipal solid waste generator and be subject to its regulation only.

Sincerely,

Jim Novak  
Environmental Manager

Dear Sir:

Please accept this letter as our request to cancel our solid waste registration, #33765. Texas Electric Cooperative, Inc. has informed us that TNRCC no longer considers distribution electric cooperatives as industrial solid waste generators and thus do not require annual reporting.

Please accept this request to become inactive as a solid waste generator. If you have questions, please do not hesitate to contact me at (817) 888-3441.

Sincerely,

Jim Novak

Texas Water Commission  
P.O. Box 13087  
Austin, TX 78711-3087

Reference: Updates to Notices of Registration for Rural  
Electric Cooperatives on attached listing.

Dear Mr. Davis:

High voltage capacitors are used by most electric utilities to improve the quality of the electric power provided to their consumers by compensating for all the inductive loading from electric motors. A high voltage capacitor typically consists of a rectangular steel enclosure about 5"x12"x14" with two porcelain bushings protruding about 12" out one of the small edges of the enclosure. Brass terminals on the bushings connect to brass rods through the bushings which then connect to metallic plates of either copper or aluminum, separated by kraft paper inside the enclosure. The enclosure is filled with a liquid for dielectric strength and welded closed. There is no way to drain the liquid from the enclosure.

Until the late 1970s, all capacitors were filled with PCBs for dielectric strength and fire prevention. Because TSCA regulations required all utilities to dispose of their PCB high voltage capacitors, all utilities are now experiencing predictable failures on their Non-PCB capacitors. I have received dozens of calls from our membership asking what is the legal and acceptable method for disposing of these capacitors. One of our members has notified the TWC of his waste and has been given the waste code number 215770. I have been unable to get any details of that notification.

The Electric Cooperatives of Texas are requesting that their non-PCB capacitors be classified as class II waste so they may

Please add 115770  
capacitors, non-PCB  
P.D.S. 4/16/91

1

178 571 elect equip, non-  
PCB cont.

2721 100

#2

dispose of these sealed capacitors in their local landfills. An average quantity per cooperative would only be about a dozen units per year.

I polled all of our 78 electric cooperatives asking them for information about their non-PCB capacitors. A copy of the letter and form sent is enclosed. The enclosed computer listing is a summary of that poll.

There are only four manufacturers of non-PCB capacitors known, and one of those, Sangamo, has discontinued the product line. Since the inert materials are all the same (steel, porcelain, brass, aluminum, etc.), the only difference between the various brands is the liquid used for the dielectric fluid.

All four manufacturers have provided me with MSDS sheets on the liquid used in their capacitors. These MSDS sheets are enclosed. Please note that Westinghouse has changed names and is now ABB Power T&D Company Inc.

Sangamo apparently used two different liquids in their capacitors, "Selectrol I" and "Selectrol II". Note that in Section VII of both MSDSs it is stated that spent capacitors may be placed in landfills.

Please amend the Notice of Registration of the Cooperatives on the attached listing.

Sincerely Yours,

*Walter Sanders*

## INTEROFFICE MEMORANDUM

TO : Files

THRU : Ernest Heyer, Program Services Unit,  
Field Operations Division

FROM : Eric Miller, Field Investigator, District 2

SUBJECT: B-K Electric Cooperative  
SW Registration No. 33765  
EPA ID None  
Fee Bill Inspection conducted 7-12-89

DATE: 8-8-89

On July 12, 1989, I conducted a solid waste inspection at B-K Electric Cooperative. This facility is located at 421 N. Main, Seymour. The following B-K Electric representatives were present during the inspection: Mr. Dan Gregg, General Manager; Mr. John Graves, System Operations' Manager and Line Superintendent; Mr. Jim Novak, Purchasing Agent and Systems Operations.

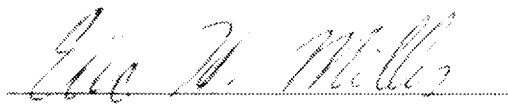

B-K Electric Cooperative is an electric utility serving the Seymour area and adjacent counties.

The following waste streams are generated at this facility:

1. **PCB contaminated material** which is generated from the maintenance of electrical equipment.
2. **Waste oil** (used motor oil) which is generated from the maintenance of company owned vehicles.

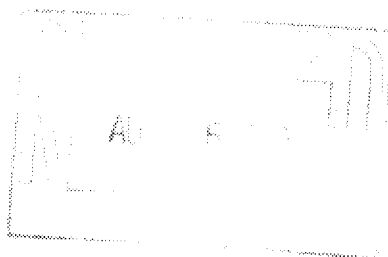

This facility utilizes one container storage area for the above waste streams. At the time of inspection, 19 drums of PCB contaminated material were stored in this area. This material was generated from downed transformers on July 7, 1989, resulting from high winds. These 19 drums will be shipped upon locating disposal facility.

No significant violations of the Texas Hazardous and Solid Waste Regulations were alleged during this inspection.

  
Eric Miller

## **NOTICE**

RE: SOLID WASTE REGISTRATION NO. 33765

THE RECORDS OF THE SELF-REPORTING SYSTEM INDICATE THAT WE HAVE NOT RECEIVED THE 1988 ANNUAL REPORT CONCERNING THE DISPOSITION OF SOLID WASTE UNDER THE ABOVE REGISTRATION.

THE REPORTING REQUIREMENTS CONTAINED IN THE INDUSTRIAL SOLID WASTE AND MUNICIPAL HAZARDOUS WASTE MANAGEMENT REGULATIONS OF THE TEXAS WATER COMMISSION ARE IDENTIFIED IN YOUR NOTICE OF REGISTRATION. FAILURE TO SUBMIT THE PROPER REPORT IS CONSIDERED A VIOLATION OF THIS REGULATION AND THE SOLID WASTE DISPOSAL ACT.

IF YOU HAVE PREVIOUSLY SUBMITTED THE REPORT, PLEASE SEND US A COPY FOR OUR RECORDS. WE SHOULD RECEIVE THE REPORT BY JULY 14, 1989. YOUR IMMEDIATE ATTENTION TO THIS MATTER WILL BE APPRECIATED. SHOULD YOU HAVE ANY QUESTIONS CONCERNING THIS LETTER, CONTACT REPORTS AND INFORMATION MANAGEMENT UNIT, TELEPHONE (512) 463-7754.

RE: Annual Report

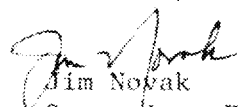

Dear Mr. Hatton:

Please find enclosed copies of the 1985 and 1986 Annual Waste Summaries. The last month of shipment of any PCB items were PCB capacitors in November 1985, which completed removal of all PCB capacitors in our system. No class I PCB wastes were generated in 1986.

In May 1986, an inspection from the TWC, District 2, Lubbock, Texas stated that waste motor oil and lubricants from vehicle maintenance require an amendment to the notice of registration (TAC 336.6). A notification was sent to the TWC Central Office for change in the notice of registration. No response was received. Please advise on whether further action is necessary on our part.

Please inform me if further information or action is needed to complete the records.

Sincerely,

  
Jim Novak  
Operations Engineer

RE: Notice of Registration -  
SW 33765

Dear Sir:

11/24/86  
JN

In response to the annual inspection conducted by the Lubbock field office on May 22, 1986, the inspector stated that the cooperative must amend the registration to include the generation and management of waste lubricating oil from vehicle maintenance. Since the opening of our maintenance shop in 1984, we have accumulated several barrels of waste motor oil and lubricants. We have not been successful in locating a licensed disposer for this collection and thus still store the barrels in our warehouse.

Please inform us as to the required registration amendment number as soon as possible so that we may complete the proper shipment records when shipment is completed.

Sincerely,

  
Jim Novak  
Operations Engineer
